29 April 2020

Dear Colleagues,

### **COVID-19 London Care Homes Resource Pack**

The NHS London Out of Hospital Cell, London Clinical Networks, London Directors of Public Health and Adult Social Care, Health Innovation Network and Public Health England are collaborating to provide practical guidance to assist the care and support vulnerable adults receive during COVID-19.

Accompanying this letter is a London Care Homes Resource Pack that was approved by the London Clinical Advisory Group on 23 April 2020. It is designed to complement and not replace local guidance and professional judgement. We would be grateful if you could share with your local networks.

We are actively working on other resources which will be updated to align to national and regional guidelines once published. The intention is to circulate an updated version of this resource pack every two weeks.

If you have further questions relating to this resource pack please contact the **London Clinical Networks** in the first instance by emailing [england.london-scn@nhs.net](mailto:england.london-scn@nhs.net)

Yours sincerely

**Jane Clegg, Acting Joint Regional Chief Nurse, Director of Nursing - Professional and System Development, NHS England and NHS Improvement, London Region**
