

September 2020

Dear Practice Managers,

Re: London School Aged Vaccination Programme Providers

The school-aged vaccination programme delivers the following routine vaccinations to children in school:

Vaccination Programme	School year
Child influenza	Reception year and years 1-7 (including all years in schools with special needs & disability)
HPV	Year 8 & 9 (plus catch ups in older years)
Men ACWY	Year 9 (plus catch ups in older years)
School leavers booster	Year 9 (plus catch ups in older years)

The delivery of the child influenza programme in London schools commences in early October. A call/recall letter for this cohort has gone out at the end of September and one for the 2 and 3 year olds will go out around the 5th October.

Vaccinations missed due to lockdown are being caught up throughout the year and are due to be completed by August 2021. If you get any requests from parents/guardians, please direct them to the relevant contact below.

Below is a list of the current school-aged vaccination programme providers for London, along with their contact information. If you receive any enquiries about the above vaccinations, please refer them to the appropriate school-aged vaccination provider for their borough. All schools are included in the school aged programme e.g. independent and special schools.

Borough	Provider name	Telephone number	Email address
Havering	Vaccination UK	0203 432 6478	havering@vaccinationuk.co.uk
