

NWL Primary care ASTHMA TRAINING

“Effective asthma care for children and young people”

- For Practice nurses, GPs and Pharmacists
- Develop your knowledge, skills and resources
- Weekly MS teams based training
- Starts Thursday 7th January 2021 for 6 weeks
 - Open session/ bring your cases 8:30 to 9am
 - Interactive classroom 9 to 10am
- Discuss your high risk patients with experienced faculty

WHY? Recent death of a 14-year-old boy from asthma in NWL. Lessons learned show importance of identifying high-risk asthma patients and delivering effective asthma reviews in primary care.

COVID-19 – new challenges but opportunity to do things differently

Aims

- Theory and practice of asthma
- ‘Case finding’ using practice searches
- Virtual MDT for your high risk patients
- Deliver best practice in asthma care
- Meet QOF Asthma targets
- Includes adolescents and young adults
